

## SUSTAINABLE HOTEL SITING DESIGN AND CONSTRUCTION

**Guiding principles** presented in a clear, cross-referenced and easy-to-follow format

A **comprehensive overview** of the issues governing sustainability in hotels

Extensive **sources of technical information** at the end of each section

Although much is known about sustainable building techniques, until now there has been no single point of reference with regard to sustainable hotel design and development. This publication has been produced by the International Business Leaders Forum and Conservation International

**A practical and accessible resource to help guide the thinking of planners, investors, hotel owners, developers and their advisors.**

**The guide covers:**

- Project inception
- Pre-design
- Creating the design brief
- Architectural and physical design
- Operational design
- Construction and refurbishment
- Commissioning and operation
- Interior design
- Monitoring performance
- Case studies
